THE MONEY MARKET EASIER

A Distinctly Strong Undertone on the Stock Exchange.

Supporting Orders Not Needed-Buyers Attracted by the Low Prices-St. Paul the Feature of the Railway List - Occasional Reactions.

NEW YORK, Sept. 10. - A further better ment in prices in today's stock market might be said to be based exclusively upon the improvement in President Mc-Kinley's physical condition, although it would be useless to deny that the preket which were precipitated by the attempt upon the President's life were also a powerful factor in the advances shown.

a powerful factor in the advances shown. The money market today was distinctly caster in all departments. Borrowers on call, it may be said, have for the time being a virtual call on money at 6 per cent, hence it is unlikely that any higher rates will be immediately quoted. For this reason private individuals and institutions not affiliated with the clearing house committee were quick to place their funds at the disposal of the market, with the result of breaking rates materially.

It was doubtless in view of this probability that the clearing house committee were quick to place their funds at the disposal of the market, with the result of breaking rates materially.

It was doubtless in view of this probability that the clearing house committee world of their willingness to extend all the requisite accommodation on the terms noted. Their display of confidence was all that was necessary to induce offerings by other lenders of money, so it may be assumed that the crisis in this respect has been passed.

In response to the representations of the local bankers, the Secretary of the Treasury today advertised for bids for 20,00,000 of Government bonds, but the acceptance of his proposal is obviously a matter which will be determined by stock market and money market conditions.

acceptance of his proposal is obviously a matter which will be determined by stock market and money market conditions. The market pone of favorably, influenced by the continued good news in respect to the condition of the President, and while occasional reactions marked the advancing tendency of prices, the market throughout retained a distinctly strong understone. London sent in slightly it regular changes in prices and the orders for foreign account in this market were about equally distributed between purchases and sales.

Supporting orders of the character noted in resterday's dealings did not appear to be necessary today and, indeed, were not apparent in any quarter. Commission houses continued to reduce its commitmente. As regards particular movements in the market, it can only be noted that St. Paul was again the feature of the relative of the rate of dividend to be declared next Thursday, it is doubtful whether the directors of St. Paul have decided definitely as to what dividend will be declared, of the movements in in whall Street, the idea commonly prevalled today that in addition to the regular 3 per cent rate an extra dividend of 1 per cent would be declared.

Other President, and while conditions seem to warrant the belief that prices will be much higher that prices will be much higher than any level they have yet attained before the end of the year if the recovery of President McKinley is as rapid and complete as now seems likely. The thing the boom will begin immediately, or rather have been almost entirely eliminated by the advance of the past two days. The public has not yet come into the market is any great force. The insiders, while they bought stocks and advanced prices yesterday morning, were sellers for the most prices are technical reasons why a recession would not be autprising how. There are other technical matters that are not prophilose any rate. While the action of the Servetay of the Treasury yesterday has probably removed dauger of a monetary stringency as the market 's now consti for foreign account in this market were about equally distributed between purchases and sales.

Supporting orders of the character noted in yesterday's dealings did not appear to be necessary today and, indeed, were not apparent in any quarter. Commission houses continued to report the execution of buying orders on behalf of customers attracted by the comparatively low level of the market and the short interests continued to reduce its commitments.

As regards particular movements in the market, it can only be noted that St. Paul was again the feature of the railway list and that the dealings in the stock were again influenced exclusively by the notions entertained regarding the rate of dividend to be declared next Thursday. It is doubtful whether the directors of St. Paul have decided definitely as to what dividend will be declared, but by one of those railfits of opinion, not uncommon in Wall Street, the idea commonly prevailed today that in addition to the regular 3 per cent rate an extra dividend of 1 per cent would be declared.

There were two crop reports yesterday, the weekly statement of weather crop conditions, issued by the Weather Bureau, and the monthly report of the statistician of the Agricultural Department. The weekly repert says of corn, and of continual two conditions, issued by the Weather Bureau, and the monthly report of the statistician of the Agricultural Department. The weekly repert says of corn, and of continual two conditions, the two crops that have been in danger:

**Reports from the principal corn pro-

The weekly report says of corn, and of cection, the two crops that have been in danger:

"Reports from the principal corn producing States west of the Mississippi River indicate that late corn is maturing rapidly and that cutting in in active progress in all sections, being nearly completed in some localities. The late crop continues to improve in Nebraska and is filling better than anticipated. In lowa the busk of the late planted fields will be beyond danger from frost by September 20, in the dry section of the State about one-half the acreage being already up. Generally favorable reports are received from States cast of the Mississippi River, with the exception of Illinois, where corn has deteriorated slightly and its maturity hastened by dry weather. Cutting is in progress in the northerly sections under very favorable conditions.

"The weather of the past week has been more favorable for cotton. This staple is opening rapidly in all sections and picking is in general grogress. Complaints of rust and shedding still continue, however, from the castern and central districts of the cotton belt, and the top crop is short in Georgia and Florida, while reports of damage by boil worm are received from Mississippi and Louisiana. No improvement is noted in the late crop in Texas, it having stopped growing and blooming in the drought-stricken districts, and is shedding and rusting badly where rain, [el].

The paragraphs on both cotton and corn

and is sneading and reasing soary water raim, fell."

The paragraphs on both cotton and corn are highly favorable. The monthly report of Statistician Hyde is a disappointment regarding corn, which, according to his figures, deteriorated to 51 during the month of August. Some suggestion that such a showing might be made has been heard, but the general opinion has been, and war yesterday, that an improvement would be shown. The report agrees neither with the weekly reports of the Weather Bureau nor with the unofficial statements of the trade papers, the railway officials, and the brokers. It will be interesting to note the effect of the report on the market.

The granger securities were, as a group, the strongest on the list vesterday. Anticipation of a good monthly crop report was one cause of this, undoubtedly. Another was the belief in many quarters that the railways of the section will have a most prosperous year and that higher prices are warranted by conditions. The ces are warranted by conditions. The cially buoyant stock yesterday was St. prices are warranted by conditions. The specially buoyant stock yesterday was St. Paul, and there was a special story to accompany its boom. The talk of an extra dividend or an advance in the regular dividend rate, was repeated peraistently. The meeting of the directors will take piace tomorrow. As far as can be learned, there has been no definite agreement as to the dividend rate, but it is thought possible by conservative people that something may be done in addition to the regular 3 per cent semi-annual dividend. An extra dividend of 1 per cent is possible. An increase of the regular rate to 7 per cent is less likely. It is not disputed that the company could pay a larger dividend very conservatively. Some important interests believe that the advance rate should be made. The reason why speculators should be cautious in making up their minds that the rate is vance rate should be made. The reason why speculators should be cautious in making up their minds that the rate is to be changed is that the 5 per cent rate was only established a half year ago and another permanent advance in the same year would be a most unusual thing. St. Paul advanced to 1664, more than Il points since the low price of Saturday. It closed 2 points off from the high, but with a good net gain, nevertheices. Atchison common advanced to 1754 and closed at 1654, with a good net gain. Rock Island and Chicago Great Western and Union Facific all boomed, the last named stock +2 Facific all boomed, the last named stock + % getting within a small fraction of par at + 5 one time and closing at 98%.

The Wahnsh securities were strong. President Ramsey is quoted as saying that the outlook for the coming year is most be set for the company. The loss on earn freight will be a comparatively small matter, as only about 10 per cent of the Wahnsh tomong is in corn. Against this there will be the immense expession business of the company to be figured on, and a number of other extra items of profit.

NEW YORK, Sept. 10.-The outside market was generally quiet, but some fair issues, including Tobacco is, which were up about one point, \$500,000 being traded in at prices ranging from 975 to 675_8 . American Can was up 14 to 24 and the preferred was 12 higher, with sales at

About 5,080 shares of Bay State Gas were traded in at 1.1-16 and 1. A. G. Wood bought and Halle Z. Stieglitz sold.
Copper stocks were steady. British Columbia sold at 14% and Union Copper at 5%. Reyal Baking Powder preferred was 15 lower at 1819. by Reyal Haking Powder preferred was be lower at 1619.
Electric Light Reduction advanced be opening at 2% and moving up to 2%.
New York Transportation was % higher, selling at 11%. Scaboard preferred sold at 20%. Cast Iron Pipe sold at 7.
